STUDENT VOICE AT THE UCS

Students are regularly invited to contribute their views to many aspects of school life, including teaching and learning, and staff appointments. Student voice surveys are held regularly throughout the year and help to develop a progressive dialogue between students and staff about life in school. This helps support ensuring that students always feel safe in school and also allowing the school community to work together to making UCS the best it can be.

Student Voice also allows students at UCS to develop their leadership skills. Through the School Council, students decide the roles and responsibilities that students have in supporting fellow students in feeling safe and supported whilst in school.
